PERSONAL INFORMATION

Date / Place of Birth: 20.07.2001 / Zonguldak

Driving Licence: Class B

Since childhood, I have been passionate about technology and committed to achieving excellence in every project I undertake. With a strong work ethic and fast learning ability, I quickly adapt to new technologies and contribute effectively to team efforts. My goal is to combine solid technical expertise with an innovative mindset to deliver value-driven solutions and establish myself as a distinguished professional in my field.

EDUCATION & Projects

High School, Zonguldak Science High School, 2015 – 2019

Computer Engineering, Bülent Ecevit University, Zonguldak, 2020-2024

□ GPA: 2.82/4

Graduation Project : Developed a QR code-based attendance system using a website, a Flutter-developed mobile app, and MySQL database. Academics generate QR codes through the website, while students use the mobile app to scan the codes and register their attendance. Additional features include viewing past attendance, taking notes, and accessing notes shared by academics.

Portfolio Website – Personal Branding Platform (Next.js, TypeScript, TailwindCSS, GitHub Pages)

Designed and deployed a modern, responsive personal portfolio website to present skills, projects, and career profile.

Focused on performance, accessibility, and clean UI/UX design to reflect a professional image.

Integrated dedicated sections for About Me, Projects, and Contact, ensuring easy navigation and showcasing technical depth.

EasyYTD V2.0 – Desktop Application

Developed a Python-based desktop application using Tkinter for downloading videos and audio from multiple websites in various formats. Implemented a user-friendly interface with resolution selection and fast download features.

Kırmızı Marketplace – Classified Ads Platform (Next.js, Prisma, PostgreSQL, NextAuth, Docker) [In Progress]

Currently developing a full-stack classified ads platform inspired by sahibinden.com.

Implementing role-based authentication, category-based listings, and dynamic filtering.

Building a secure login/register system with NextAuth v5.

Containerizing the app with Docker Compose for production-like development environments.

Focus on clean architecture and scalability to ensure maintainability and future extensibility.

Stock Tracking Application (C#, .NET, SQLite)

Developed a desktop stock tracking application using C# and .NET Framework.

Implemented product management features: adding, updating, deleting, and searching products.

Integrated SQLite database for persistent data storage and retrieval.

Designed a user-friendly Windows Forms interface for efficient inventory management.

Demonstrated strong understanding of database operations, object-oriented programming, and UI development in C#.

EXPERIENCE

Internship - 2M Kurumsal AZETech Bilgisayar Yazılım San. Tic. A.Ş

-Front-end Developer

Worked on creating and editing websites using HTML, CSS, and JavaScript.

-Hardware Maintenance

Performed maintenance, assembly, and installation of computers and servers.

-Network Operations

Implemented SNMP technology to retrieve and transmit data from various devices.

Conducted printer monitoring and information collection via SNMP protocols.

COURSES

IoT (Internet of Things)

Zonguldak Bulent Ecevit

Digital Leadership

Galatasaray University

CERTIFICATES

IoT (Internet of Things) Certificate

Digital Leadership Achievement Certificate

COMPUTER AND LANGUAGE LITERACY

Frontend: HTML, CSS, JavaScript, React, Next.js, Flutter

Backend: Python, C#, .NET

Databases: MySQL, PostgreSQL, Prisma

Tools & Platforms: Git, Linux, Node.js, Docker

LANGUAGE

Turkish (Native), English (Intermediate)
